Page Template

Default

Modal 01

Back to Index

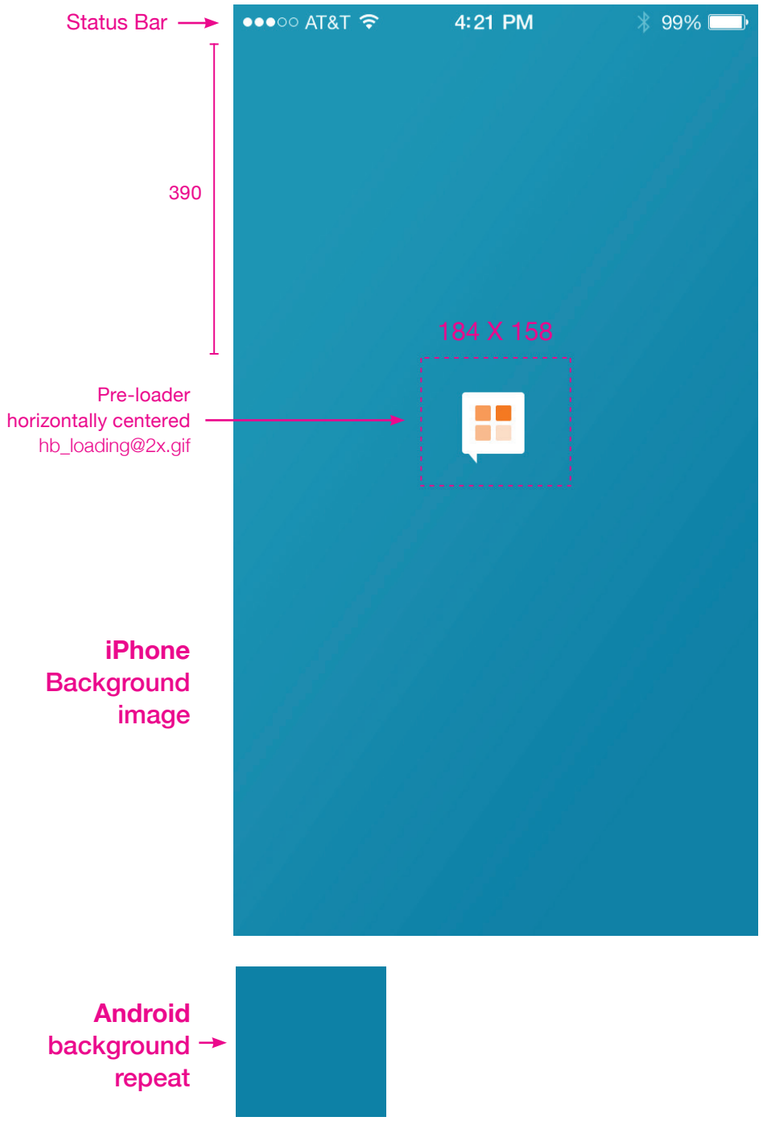

Splash / Sign In Loading

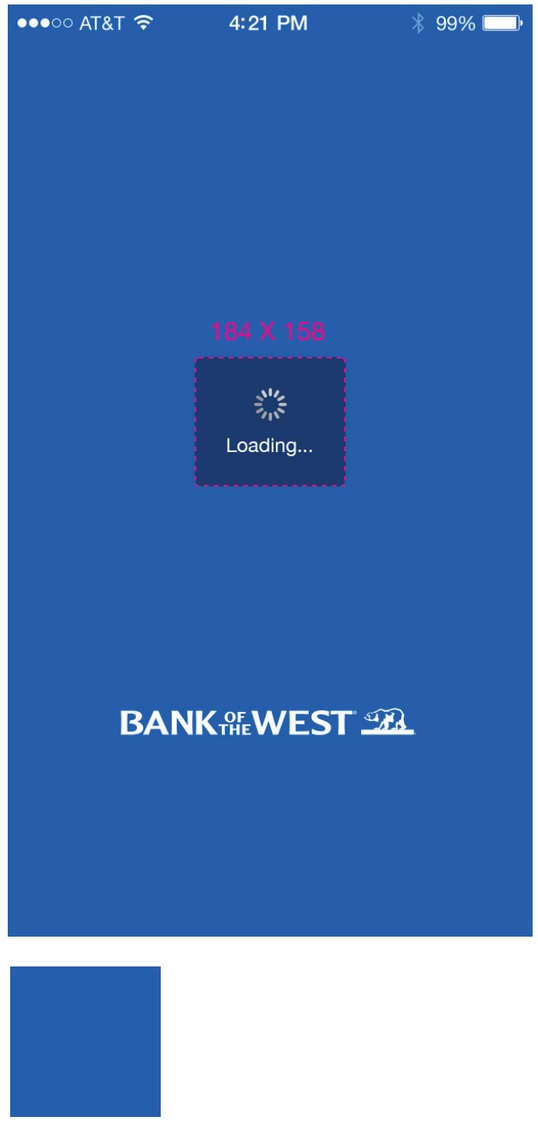

1. Background image + loader animate in when app opens
2. (direction is controlled by OS)

3. Then, loading animation fades in: 250 milliseconds fade-in

   Then, the solid blue background image and the loading animation then fade out together to reveal actual sign-in screen: fade out = 250 milliseconds. (Hello Bank logo image persists and becomes the logo that sits on top of the Sign In screen.)

   *Actual fade-in times will need to be reassessed and possibly adjusted once we see how things look once built.
